Great Hair?
Thinning Hair?
Severe Loss?

Keep It
Restore It
Replace It

So... what is PDOplus ?

Hair Again, with more than 40 years experience in hair restoration, is the first clinic in the Central Valley to offer a unique and effective therapy to reverse hair loss: **PDOplus**

Thread Embedding Therapy (TET) is a proven, breakthrough medical procedure to counter hair loss. It's an outpatient, non-invasive, non-surgical procedure that uses a small dermal needle in the scalp, and polydioxanone (PDO), a dissolvable thread (think soluble sutures). It stimulates hair growth by rejuvenating tired, weakened follicles. Best of all, it takes less than one hour. There's no recovery, no downtime and no aftercare, and there are no activity restrictions. You can carry on with your life. PDO, which was invented in South Korea, has been FDA-approved. In recent years, TET has been widely used for cosmetic purposes, such as reducing wrinkles and tightening facial skin – an alternative to invasive face lifts – based on the belief that the PDO will help regenerate connective tissue. And now it's being used to regenerate hair. You may see results in 4-6 months.

How does it work ?

Quite simply, **PDOplus** stimulates your hair re-growth by releasing growth factors and increasing blood flow in the treated areas. **PRP** is also associated with neo-vascularization and collagen regeneration, so if you're also undergoing **PRP** treatments, the PDO threads enhance those effects. The threads used in **PDOplus** have been FDA-approved to form new blood vessels (neo-vascularization), regenerate collagen types I and 3, and break down fat (lipolysis). Hospitals have used PDO safely for decades, with no problems with allergies or long-term complications.

Why choose Hair Again & PDOplus ?

Since 1977, Hair Again, locally owned and operated, has helped people in the Central Valley by using innovative and effective solutions to help people dealing with hair loss. We utilize HairCheck, a new patented technology that precisely, accurately measures hair loss, growth, and breakage.

So if you have concerns about hair loss, call us now to arrange a free hair and scalp evaluation.
